

CorrecTable

CorrecTable® Series

CorrecTable® Series

You're looking for a lightweight folding table that is suitable for continual daily use. You don't want a table that has openings that can conceal contraband. You don't want a table that has screws, nuts or bolts that can be taken apart. You want a table that can stand up to the use and abuse of an institutional environment. You want the Norix CorrecTable®.

Lightweight and Versatile

Most rooms today have to serve more than one function. You might start out the day with roll call and assignments. Later you're using the same space for a lecture or training session. It might become a break or lunchroom. Later it's used for a class session. The CorrecTable fits all of your needs and is easily moved around or stored by one person.

The top is one-piece blow molded high-impact polyethylene with an egg crate bottom for exceptional strength. The 14 gauge full-length steel frame is supported by folding wishbone legs made from 1" diameter 16 gauge tubular steel. Together, these components combine for an evenly distributed load capacity in excess of 1700 lbs.

Secure and Safe

All Norix products are designed to meet and exceed rigorous requirements for all kinds of institutions. CorrecTable is no exception. Tube end caps are permanently sealed so they can't be used for hidey-holes. The support frame is attached to the top with tight fitting compression nuts. The whole table is formulated for outdoor exposure, just in case you want to conduct an outdoor class session.

Color Choice by Henry Ford

We offer seven sizes; six rectangles and one 60" diameter, and as Henry Ford might say, "Pick any base color you want, as long as it's black." The top however, is a nice medium grey. Go ahead, pick a size.
