

Econo-Max

Econo-Max[®] Series

Econo-Max[®] Series

You need to economize, but you can't sacrifice strength, durability and the other features that define "intensive-use" furniture. The Norix solution is Econo-Max, a table that meets the rigid requirements of an institutional environment, but still has a quality appearance and a budget price.

A Tradition Of Quality

We start with the same patented, unique style of the 14 gauge steel Max-Master table leg, except with a more streamlined tube diameter. The top and seat mounting supports, however, are still 6" x 6" x 1/4" thick steel. And, the bottom of the vertical seat tube still incorporates a fully welded inset in order to enclose a tamper-resistant anchor bolt or the non-removable adjustable glides we use on the Quietcore[®] model. No openings to conceal contraband or absorb moisture. Factory applied powder coat paint for a tough long-lasting finish.

Custom Features, Budget Price

Choose the 13" diameter Super Slammerstone® seats; a high-density, color-impregnated, compression molded composite that is highly scratch and stain resistant. They feature four molded-in threaded inserts to provide a super tough, superior metal-to-metal connection to the base. Select from eight standard colors to add a little pizzazz to the décor. Basic stainless steel with a #4 satin finish to match the stainless steel top is another good choice. Either style provides an attractive, easy-to-clean budget-priced table.

You have two choices for the table top: stainless steel in a #4 satin finish or our exclusive wraparound Quietcore® stainless steel, also with a #4 satin finish. Quietcore® gives you the durability and maintenance-free attributes of stainless steel while reducing the high acoustic levels inherent in institutional settings.

Other features include sizes to seat four, six or eight people, a wall-mount desk and checkerboard patterns.
