

Hondo

Hondo Series

Hondo Series

Which company will create an intensive-use foam-filled lounge chair with ample lumbar support and a contemporary sense of style? Norix, of course, the same company that has been specializing in designing and developing attractive, yet functional furniture for intensive-use applications for over 20 years.

Creativity Based On Need

If you listen close, the market will tell you what products it wants and needs. We like that approach at Norix. It really takes the guesswork out of deciding what we should do next. Our staff and salespeople took copious notes from health care workers, correctional officers and commercial facility planners. We then created Hondo, a foam-filled, tough-skinned lounge chair that looks as good as it feels.

Outer Beauty, Inner Soul

Hondo starts with modern design and incorporates ergonomically correct style and comfortable lumbar support for your back. The design is then transformed into a beautifully tough satin finish PVC skin. Not just a pretty face, the chair passes the tough California TB-133 Flammability Test Procedure for Seating Furniture for Use in Public Occupancies. The thick sturdy 250 mil. skin is hard to cut, too, and comes in eight appealing colors that go all the way through so you don't have to worry about the surface color scratching away. The skin is then plumped on the inside with 3 lb. per cubic foot density flexible polyurethane foam to provide comfort, support and structure. Firm, but with enough suppleness to make sitting or waiting an acceptable and agreeable experience.

Multi-Purpose Base and Easy Clean-up

The recessed base under Hondo is much more than just a solid platform. It also encompasses a side-to-side add-on ganging device that allows you to create rows of lounge seating in the wink of an eye. Concerned about spills or blood-borne pathogens? Another unique design feature lets you wash down or steam clean Hondo without having to worry about liquid seeping into the base or interior. The skin is easily cleaned with standard household or commercial cleaning products and is impervious to blood, vinegar, urine, feces, salt and chlorine solutions.
