

Jupiter

Jupiter Series

# Jupiter Series

Sometimes you want a table that is easy to move around. Other times, you'd like that table to stay in one place, but you don't want to bolt it to the floor. Enter the Norix Jupiter Table! Jupiter is designed to be ballasted on site to maintain space flexibility and allow for efficient floor maintenance as the needs of an environment change. Loading the base with up to 300 pounds of sand keeps the table solidly in one place. It can still be moved, but not hurled by staff.

## Start at the Bottom

Jupiter Tables are in it for the long haul. Constructed of durable rotationally molded polyethylene, this rugged thick skin is easy to clean and impact resistant. A threaded screw cap seals the ballast cavity and a caulk groove provides a secure finish.

Tamper-resistant hardware and steel-to-steel connections secure the top to the base. An innovative ring underneath provides stability and protects against floor scratches.

## Finish on the Top

You can pick a variety of top materials and patterns. First, there's Nu-Stone®, a unique specially formulated fiberglass filled, compression-molded polyester composite. You get a seamless one-piece top and edge with through and through color for superior impact resistance and surface wear-ability. Pick from GraniteStone or PebbleStone, both in a non-glare, matte finish.

If laminate is more your style, we use the toughest grade available and seal it with a specially formulated, highly durable molded urethane edge. The permanently affixed edge has a radius profile for safety and comfort making it ideal for food service applications. We can also provide our exclusive game top pattern that includes checkers, chess, backgammon and solitaire.

Popular top sizes are available in either Plain or Game Top and come in 36" Round and Square; 42" Round and Square. Nu-Stone is available as a 42" table only.
