Table

Leg Style Table

When you start with 4" diameter 14 gauge tubular steel legs fully welded to 1/4" steel mounting plates, you end up with an incredibly strong, stable and durable table. The legs are joined to the top using tamper-resistant screws connected to embedded t-nuts. Metal to metal fastening. Legs that are solid as a rock when attached. Lean on it with all your weight.

The Leg Style table won't wobble or tip.

That's peace of mind.

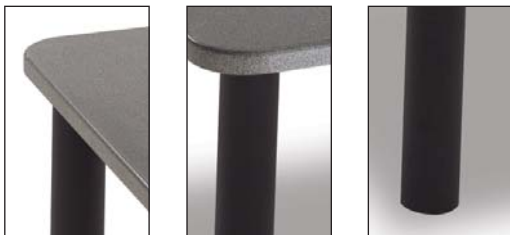

WHAT'S ON TOP?

Choose a table top with Nu-Stone®, a compression molded fiberglass-filled polyester composite that looks like granite. You get a seamless one-piece top and edge with through and through color for superior impact resistance and surface wear-ability. Pick from GraniteStone or PebbleStone. If desired, we can even laser etch a checkerboard game top in the surface.

Or, you might prefer a commercial quality laminate surface. We pressure fuse ours to the core with a specially formulated, highly durable molded urethane edge. The permanently affixed edge has a radius profile for safety and comfort making it exceptional for food service applications.

We can also provide our exclusive game top pattern that includes checkers, chess, backgammon and solitaire.

UNDER AND BEYOND

The Leg Style table is engineered and built for continuous daily service in any intensive-use environment, but sometimes you want to make sure it stays put. In addition

to super tough adjustable glides, we also give you the option of bolt-down tabs...just to be sure.
