

Max-Master

Max-Master Table® Series

## Max-Master Table®

Finally! A table that can stand up to both teenagers and prison inmates. The Max-Master has endured some pretty tough environments. Factory lunch room. High School cafeteria. Prison dining hall and day rooms. Food courts. Whether bolted to the floor or free-standing on adjustable glides, the distinctive individual seat/leg design provides more stability than traditional pedestal tables.

## Check Out Those Legs

Our leg design is so unique it's patented. A pretty good place to start. The curved section is fully welded to a vertical seat support and both the seat supports and top supports have 6" x 6" x 1/4" thick steel mounting plates welded on. When you consider that the tube is 3" diameter 14 gauge steel, you begin to get the picture that we're talking serious structure here. The bottom of the vertical seat tube has a fully welded mounting plate inset that holds either a large-stem adjustable glide or an enclosed tamper-resistant anchor bolt. No openings to conceal contraband or absorb moisture. We then finish them with black powder coat paint for a tough long-lasting finish.

## The Best Seat In the House

In addition to stainless steel, we have eight standard colors to choose from so you can add a little pizzazz to the décor. These 13" diameter Super Slammerstone® seats are a high-density, color-impregnated, compression molded composite that is highly scratch and stain resistant. They also feature four molded-in threaded inserts to provide a super tough, superior metal-to-metal connection to the base.

## Topping It Off

Max-Master comes in sizes and shapes to fit four, six or eight people and can also be configured to accommodate wheelchairs to ADA specifications. Select from decorative high-pressure laminate or stainless steel inlay with a highly durable molded urethane edge. The permanently affixed edge has a radius profile for safety and comfort making it exceptional for food service applications. The 4-seat model is also available in Nu-Stone®, our granite look-alike made from a compression molded fiberglass-filled polyester composite. Most tops can be ordered with a game top pattern, too.

## Variations On A Theme

If space is a consideration, the Max-Master table also comes in a wall-mount version that is suitable for counter-type seating or as an individual desk. Great for diners, dayrooms, study areas or cells.
