

Progress

Progress Series

Progress® Series

What do you think of when you think of progress? Advancement? Evolution? Development? Improvement? A big step forward? Progress is a passive ergonomic stackable chair that can be ordered as a sidechair, a linking sidechair or an armchair. That's Progress! Now you have an evolutionary choice that includes looks, function and comfort.

Looks

With or without upholstery, the Progress chair looks good in any environment. Pick from five seat and back colors or 32 fabric colors to go with black legs and you have an attractive combination to accent a training room, a classroom, a lobby or an office.

Function

The simple impressive design and assembly of Progress means no nuts, bolts, welds or rivets to aggravate you. Easy stacking for those times when you want more floor space. Side-to-side ganging without the use of tools is also available, and if you need arms on the chair, you can have them for the asking.

Comfort

In addition to having a comfortable leg, seat and back angle, Progress has an ergonomically designed back with a living hinge to provide the flexibility required for long term comfort in seminars, waiting rooms or classroom sessions.
