

Roto-Mold

Roto-Mold Series

Roto-Mold Series

The Roto-Mold Series from Norix are chairs designed and built to take on the harsh treatment encountered in tough institutional environments, high traffic areas and intensive use applications. These chairs are rotationally molded in one-piece from specially formulated fire retardant, high-impact polyethylene with UV stabilizers to reduce fading. Available in eight appealing standard colors, most Roto-Mold chair products can be ganged together, bolted-down or weighted on-site for added security. All products pass the rigid California Technical Bulletin #133 Flammability Test procedure for Seating Furniture for use in High-Risk and Public Occupancies.

Toughcare[®] Lounge Chair

The Toughcare Lounge Chair is designed to be used as a stand-alone arm chair or ganged together in straight-line or arc configurations. They can also be bolted in-place to the floor or weighted with sand ballast. The Toughcare chair is ergonomically designed for comfort without the use of foam for cushioning. Completely washable, the chairs are resistant to blood, vinegar, urine, feces, salt and chlorine solutions. Molded-in threaded inserts permit optional tamper resistant side-to-side and back-to-back ganging.

Mega-Max[®] Sectional Lounge Chair

All of the same great features of the Toughcare chair, but without arms. Use individually or ganged together for couch-like lounging. Full perimeter floor support facilitates cleaning and polyethylene bottom won't leave dents or rust marks in your floor.

Ultra-Max[®] Chair

You'll love the versatility of the Ultra-Max Chair. Use it in rows or pull it up to a table. Weight it with sand and you won't have to worry about anybody throwing its weight around. Hose it down, scrub it with soap or steam clean it and your chairs will look like new...year after year.

Threaded Screw Cap

The threaded screw cap allows for easy ballasting so you can maintain space flexibility while providing the safety and security of a heavily weighted chair. Secures with tamper-resistant hardware (provided).
