## Table

Years ago, a jail commander gave us the task of designing an institutional-grade table that defined each person's space and hindered the passing of contraband from one individual to another on the opposite side. Our answer was the popular, rugged Slammer Table with its unique "X" base design. Today, the Slammer Table is used in jails and other institutions all across the country.

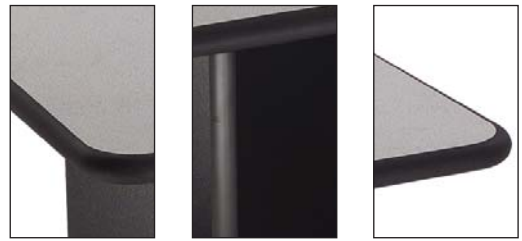

### THE PROPER FOUNDATION

The key to the Slammer table is your choice of the "X" style bases. First and still best, is our traditional laminated wood base: 1-1/2" thick 45 lb. density particle board faced with .050" thick high-pressure laminate. It's then edge banded with heavy duty T-molding that's fully glued and steel pinned. You then attach it to an intermediate mounting plate that joins the base to the top with tamper resistant hardware.

### THE ECONOMICAL BASE

Rotationally molded from specially formulated fire-retardant, high-impact polyethylene with U.V. stabilizers to reduce fading. Capped openings on the top of the base allow it to be weighted on-site before attaching the top with tamper resistant hardware. Presto...a heavy-weight table that stays put without having to bolt it to the floor.

### TOPPING IT OFF

Choose a table top with Nu-Stone<sup>®</sup>, a compression molded fiberglass-filled polyester

composite that looks like granite. You get a seamless one-piece top and edge with through and through color for superior impact resistance and surface wear-ability. Pick from GraniteStone or PebbleStone.

Or, you might prefer a high quality laminate surface with an edge that is pressure fused to the core with a specially formulated, highly durable

molded urethane material. The permanently affixed edge has a radius profile for

safety and comfort making it exceptional for food service applications. We can also provide our exclusive game top pattern that includes checkers, chess, backgammon and solitaire.
