Fabrication & Material

Legs: The curved, tubular steel that supports the top has a 25.5 cm radius bend to facilitate easy cleaning beneath the table. This curved piece is fully welded to a vertical steel tube that supports the seat. The top of the curved tubes and top of the seat tubes have fully welded 15cm x 15cm x 0.63cm thick steel mounting plates for installing top and seats. Bottom of seat tube has a fully welded mounting plate inset. For free standing applications, the inset is threaded to accommodate a tamper and skid-resistant, adjustable glide with a 1.3 cm diameter stem. For bolt-down application, the inset has a hole for the fully enclosed, tamper-resistant, bolt-down system. 7.5 cm diameter, 14 gauge steel tubing.

Standard Laminate Top: 20.5 kg density particle board, with embedded T-nuts for securing the top to the base. Decorative high-pressure laminate sealed with a specially formulated, highly durable Slammer Stone edge. Edges are radiused for safety and pressure fused to the top rendering it firmly attached and highly sanitary. 3.8 cm thick edge profile.

Super Slammer Stone Seats: 33 cm diameter high-density, color-impregnated, compression-molded composite that is highly scratch and stain resistant. Four molded-in threaded inserts for superior metal-to-metal connection.

Made in the U.S.A.

Maintenance

Laminate Tops: For wood products, Norix recommends using a mild wood cleaner for routine and regular cleaning maintenance. For the deep-scrub cleaning of tougher stains, marks and debris, we recommend the use of a regular-strength wood cleaner. Legs and Stainless Steel Inlay Tops: When cleaning stainless steel, Norix recommends the use of a cleaner made especially for stainless steel products.
