

High Brights

Norix Furniture's new High Brights color palette is available in the Hondo Nuevo® and Forté™ series of furniture and includes four lively colors that help facilities humanize environments that have historically been considered institutional. The palette strays from the unexciting monochromatic neutrals that have often been found inside challenging environments in order to provide visual interest and positive distraction —and colors can be matched to the personality of the region where facilities are located.

Hondo Nuevo® Series

The Hondo Nuevo® series combines modern design, ergonomically correct style and comfortable lumbar support with a beautiful, thick vinyl skin and 3 lb. density polyurethane foam filling. This unique combination of superior durability, comfort and style is available in several seat, bench and wedge options to create flexible modular indoor seating arrangements. Molded exterior skin tops are attached with tamper resistant fasteners to your choice of molded plinth, steel, molded wood grain leg or genuine wood leg base options.

Molded Plinth Base

Steel Base

Wood or Molded
Wood Grain Legs

Smooth, exterior surface is impervious to fluids and highly puncture resistant, yet easy to clean and sanitize. Fabricated drip edge allows moisture to run off the chair and not into the base. Hondo Nuevo is compliant with multiple flammability standards, including CAL TB133, as well as the rigorous BIFMA 5.4 durability standard for lounge seating.

Forté™ Series

Forté is the designer series of indoor furniture that is fashioned for comfort, flexibility and durability. With a variety of colors to choose from and an upholstery option for seating, this series is made to humanize intensive-use environments and includes a lounge chair and guest chair that come with or without arms. These products are engineered and proven suitable for daily use in demanding environments.

This uniquely suited furniture series is constructed with premium fully compounded material for superior color, fire retardancy and quality assurance. High-impact polyethylene with ultraviolet light stabilizers delivers unparalleled durability capable of performing in the most challenging environments.

Forté™ Arm Lounge Chair

Forté™ lounge chair's ergonomic seat contours provide optimal support while backs are slightly reclined for comfortable sitting with or without optional upholstered foam cushioning. Ample width, proper seat height and intentional arm extension allows for hand over ankle positioning to provide easy egress. Arm and armless chairs are available in your choice of steel or wood base and are engineered with smooth, continuous surfaces for easy cleaning and rounded edges for safety.

Forté™ Arm Guest Chair

Forté™ designer guest chairs are fashioned for comfort, flexibility and durability. Ergonomic contours provide comfortable support with or without optional upholstered foam cushioning. Ample width, proper seat height and specific arm placement promotes easy egress. One piece, seamless construction and premium polymer provides for easy cleaning and rounded edges add safety. Ganging and ballasting capability assures chairs can be reconfigured as future needs require.

Forté™ Armless Guest Chair

Our guest chairs are made of one-piece rotationally molded polyethylene and are manufactured with ergonomic contours that provide comfortable support. These chairs are pitched slightly forward and allow for comfortable sitting at tables.

At Norix, we design innovative, robust furniture that meets the real-world need for humanizing challenging environments.
